

“Three Identical Strangers”

If you had never seen “The Sixth Sense”, the last thing you would want before you settled into your seat would be for someone to give away the ending. With that in mind I do not intend to say anything to spoil the manifold surprises which are in store for you in this fascinating and surreal documentary. It begins with a young man’s first day in college. He knows no one on campus but people keeping greeting him as an old friend. What is going on? For the answer you will have to see “Three Identical Strangers” - A mystery which perfectly exemplifies the old adage that truth is stranger than fiction. A not to be missed film.
